

Activity

Performance highlight

Biological Resources →P.26~P.35

A society that values sustainable biological resources

Supporting Sri Lankan tea farms to obtain Rainforest Alliance certification

Number of large farms assisted to obtain certification **94 farms**

Percentage of certified large farms that have been certified with Kirin's support **Approx. 30%**

Number of small farms assisted to obtain Rainforest Alliance certification **Total 2,120 farms**

Supporting coffee plantations in Vietnam to obtain Rainforest Alliance certification

Number of small farms assisted to obtain Rainforest Alliance certification **309 farms**

- Others**
- Use of FSC-certified paper or recycled paper for office paper **100%**
 - Response to sustainable palm oil (Except palm kernel oil) **100%**
 - Reduction of food waste (compared with 2015 levels) **-80% (2020)**

Containers and Packaging →P.44~P.57

A society that circulates containers and packaging in a sustainable way

PET bottles

Ratio of usage of recycled resin for PET bottles **4.9%**

R100 PET bottles made of 100% recycled PET material

Paper containers made of FSC-certified paper

Paper container

- Use of FSC-certified paper for 6-can packs **100%**
- Use of FSC-certified paper for gift boxes **100%**
- Use of FSC-certified paper for drink boxes **100%**
- Use of FSC-certified paper for cardboard cartons for products **100%**

Water Resources →P.36~P.43

A society that values sustainable water resources

Water reduction

Rate of reduction of water consumption rate (Compared with 1990 levels) **-49%**

Rate of reduction of water consumption rate (Compared with 2015 levels) **4%**

Amount of water use (Compared with 2019 levels) **-25%**

Amount of water use (Compared with 2015 levels) **-52%**

Water Source Forestation Activities

Number of participants total **Approx. 32,000 people**

Number of water source conservation sites in Sri Lanka tea farms

Number of water source conservation sites **12 locations**

* This region covers the Oceania region where Lion conducts business activities, excluding New Belgium Brewing.

Waste

Recycling at the plants

Recycling rate **100%**

Kirin Group's Environmental Vision 2050

Enrich the Earth with Positive Impact

Kirin and its broad stakeholders enrich society and the Earth for future generations through positive impact on people and the environment.

Climate Change →P.58~P.71

A society that has overcome climate change

GHG emissions reduction

GHG emissions from the entire value chain **4,411 thousand tCO₂**

GHG emission reduction rate - Scopes 1 + Scopes 2 (Compared with 2019 levels) **-13%**

GHG emission reduction rate - Scopes 1 + Scopes 2 (Compared with 2019 levels) **-12%**

Renewable energy

Ratio of renewable energy to electricity used **17%**

Kirin School Challenge

The number of students total **1,097 people**

RE100

CLIMATE GROUP | **cdp**

RE100 membership, SBT1.5 approved
