

Governance

Governance

Supervisory structure

In the Kirin Group, the Board of Directors deliberates and resolves on the basic policies of the CSV, including environment-related issues, medium- and long-term strategies, annual plans, and important non-financial targets and KPIs, including environmental targets. The Board also monitors the execution of the Group's environmental operations and important risks, including climate change, natural capital, and the circular economy, on a quarterly basis through monitoring the progress of non-financial targets.

Executive structure

In the Kirin Group, the Group Executive Committee deliberates and makes resolutions concerning the setting and revision of important targets, as well as investment plans, related to climate and environmental issues as a whole, such as natural capital and the circular economy. The Group Executive Committee receives reports from operating companies and divisions on the status of target achievements and risks, and supervises these operating companies and divisions. The senior executive officer in charge of CSV strategy oversees environmental issues such as climate change, natural capital, and a circular economy.

The Kirin Group has established the Group CSV Committee (meets three times a year). The committee is an advisory body to the CEO and COO that discusses environmental and other CSV issues across the Kirin Group. The committee is co-chaired by the CEO and COO of Kirin Holdings, with its members being the CEOs of major Kirin Group companies and senior executive officers of Kirin Holdings. With the participation of outside experts from a

multi-stakeholder perspective, as necessary, this committee engages in in-depth discussions on matters such as current and future sustainability issues, the degree of dependence, and the degree of impact, as well as risks and opportunities associated with these issues. The committee then reports its decisions to the Board of Directors.

The Kirin Group has established the Group Environmental Meeting (meets twice a year) under the Group CSV Committee. This meeting has the officer in charge of CSV strategy as the chair and the relevant senior executive officers and department heads as members. Key agenda of the Meeting include "Sharing awareness of sustainability-related risks and opportunities and discussing strategies" and "Monitoring of progress related to roadmaps towards achieving the Kirin Group's Environmental Vision 2050 and exchanging opinions on related policies, strategies, and plans." For instance, the committee considers risks and opportunities related to major transactions such as raw material procurement and discusses the transition to regenerative agriculture and its financial impact. The discussions at the meeting are then presented to the Group CSV Committee and the Board of Directors as necessary. This structure strengthens efforts to address sustainability issues as required by the Japan's Corporate Governance Code, revised in 2021. Environmental management, including addressing climate change, is implemented as part of the CSV management system. The Kirin Group has established the Group Risk and Compliance Committee (meets twice a year and as necessary). This committee consists of executive officers from Kirin Holdings, and makes resolutions concerning Group-wide risk

management policies and the identification of important risks and reports the results to the Board of Directors as necessary. This committee also controls environmental risk management activities.

Starting from the 2022 Medium-Term Business Plan, performance-linked remuneration for senior executive officers reflects the target achievement rate for non-financial indicators, as an incentive to promote the medium- to long-term business plan. Regarding KPIs linked to remuneration, we have set a target of reducing GHG emissions by 28% (vs. 2019) in order to achieve the "SBT 1.5°C" for climate change, water usage (2.4 l/l) at manufacturing sites with high water stress as a target related to both climate change and natural capital, and in terms of a circular economy, "40% use of recycled resin for PET bottles in Japan." as target values for 2025.

The CSV Commitment is the mid- to long-term action plan by which each operation addresses toward realizing the "CSV Purpose," which translates our Corporate Philosophy into its social significance, based on the "Group Materiality Matrix." Environmental goals, including those related to climate change, are incorporated into this CSV Commitment as one of our non-financial KPIs. These goals are set as performance indicators for each Group company and reflected in their management plans. Progress on these goals serves as a performance evaluation indicator for the CEOs of the Group companies. From an internal management perspective, we review and update the targets annually, monitor progress quarterly, and report to the Kirin Holdings Board of Directors.
